Subject . Sale of Lloyd's Accumatic 100 Calculator

The company has made arrangements for the acquisition of a very fine miniature electronic calculator for sale to employees at a price of \$65 plus sales tax. These units are on sale in stores throughout the U. S. at \$99.95. This calculator includes four "D" batteries, AC adapter, and sturdy leather-like carrying case. Other features are:

- . Instant addition, subtraction and multiplication.
- . Performs chain multiplication and division and mixed calculations.
- . Has easy-to-read pop-up 8-digit liquid crystal display panel, full floating decimal, and automatic constant.
- . Easy to use--performs calculations the way people think.
- . Automatic battery level indicator prevents errors as batteries age--all number 8's appear on display.
- . Operates on four "D" cell batteries...or with AC adapter.
- . AC adapter will recharge nickel-cadmium batteries.
- . 10,000 hour life on liquid crystal display.
- . 10-1/2 hour battery life.
- . Measures only 2-1/2 x 5-3/4 x 9-1/4 inches.

A sample unit is available for inspection and tryout in Bldg. 001, Room 11D-56 from 7:30 a.m. to 4:00 p.m. daily. Both Alice Wheeler and Lloyd Ho, Extension 2213, at the noted location can process your order.
